Attention Sayreville Residents and Water Department Customers

Please be advised that Sayreville Water Department is asking you to conserve water and voluntarily restrict non-essential water use. While all our systems are functioning normally, we would like to avoid mandatory restrictions in the near future.

We ask that you adopt an odd/even outdoor water use schedule based on the address of your residence or business. For planned communities and apartment complexes, recommendations are listed below.

Odd/Even Watering Guidelines

- Outdoor water use on odd numbered calendar days based upon your street address. (i.e. 21 Main St.)
- Outdoor water use on even numbered calendar days based upon your street address. (i.e. 174 Main St.)
- Planned communities and apartment complexes to the north of Washington Road should water on odd numbered calendar days. (i.e. Reflections, Sheffield Mews, Main St. Townhomes, Park Village)
- Planned communities and apartment complexes to the south of Washington Road should water on even numbered calendar days. (i.e. LaMer, Colony Club, Harbour Club)
- Please refrain from water use on the 31st day of the month.

We thank you in advance for your cooperation and helping us conserve water.
