**RE: Solid Waste Letter
Prestige Plumbing and Heating, Inc. Site Plan
Block 422, Lot 8.01
Borough of Sayreville, Middlesex County, New Jersey**

Dear Board Members:

The applicant's proposed use is for a general office serving their Heating & Plumbing business. Solid waste that is generated is from office refuse only. They have advised that the materials used in the construction and installation in their various projects are delivered to the construction sites and disposed of at the same sites via dumpsters. Behind the building, they will be storing vehicles and smaller tools and equipment.

They indicate that traditional dumpsters are not needed at this site. They will be utilizing small refuse containers (e.g. cans) that will be picked up by a private hauler in the early morning, one or two times per week.

It should be noted that the applicant does own a roll off container truck which is used in the course of their business. However, the roll off containers are not for the handling of refuse generated at the above site, and may be parked on the site, in the rear, from time to time.

Should you require any additional information please feel free to contact me at the number above.

Very truly yours,

EAST POINT ENGINEERING, LLC
